

INTERNSHIP OPPORTUNITY

Looking to form part of a team that is defining the future of marketplaces with cutting-edge, scalable technology? The Internships opportunities are: **IT Administrator Intern (x1)**, **Platform Engineer Intern(x1)**, and **Web Developer Intern(x2)**.

As an intern within Ringier South Africa, you will get exposure and experience in your field of expertise with a subject matter expert mentor by your side. We are looking for passionate individuals with an enthusiasm for data and tech to help us in our mission.

You will be part of a 12-month internship. The first 6 months will be project-based learning different skills and technologies that we use within the business and in the final 6 months you will be integrated into a dynamic team to put your skills to work!

Who are we?

Ringier South Africa is a technology company supporting international marketplaces with our Head Office based in Cape Town.

We build and maintain the tech for Classifieds Marketplaces across the world, with a specific focus on emerging markets in Africa and Asia. Our platforms attract millions of views per month, and are market leaders in their respective countries. Our solution is called “*Cube*”, and aims to solve all of the technical requirements for running a highly scalable, highly available marketplace business. It does this while still giving local customisations for different countries and continuously improving from what we’ve learned in other markets.

Why work for us?

- We are fully remote! Work from anywhere in the world.
- You will be working with over 80+ highly skilled technical minds (and expanding)
- Backing of the international media powerhouse Ringier AG, which allows us to access world class development resources, shared knowledge and a wealth of international business insights.
- Our teams work with a wide range of tech stacks.
- We are committed to the future growth prospects of our employees by allowing autonomy, flexibility and an opportunity to master your respective skill.

Our tech stack?

- Gsuite
- Jira
- Slack
- AWS
- Linux/Mac/Windows
- UniFi Aps & RPi's
- Github
- Cloudflare
- Nginx
- Docker/Terraform/Ansible
- Fargate ECS & EKS/RDS Aurora
- Elasticsearch based web application/.NET Core
- Android/Java-based mobile apps

- Memcached/Redis/SQS
- Datadog/Pingdom/Pagerduty
- Jenkins
- PHP
- TALL Stack (Tailwind, AlpineJS, Laravel, Livewire)
- Laravel Nova
- PHPunit / Dusk / Cypress Test Suites.

What you will need?

- Relevant Computer Science Degree or similar
- Some experience in scripting and programming skills
- Critical thinking with good analytical and problem-solving skills
- Strong attention to detail
- A hunger for learning and self-motivated
- Proficient in written and oral English communication
- Team player
- High attention to detail
- Ability to work and learn remotely
- Stable internet connection

Join us in shaping the future of technology!
